DEPARTMENT OF NATURAL RESOURCES

LARRY J. WILSON, DIRECTOR

CERTIFIED MAIL

Walter P. Waters  
Ames Laboratory DOE  
G40 TASF, Iowa State University  
Ames, IA 50011-3400

Re: DNR Project Number: 96-288  
Plant Number: 85-01-057, Permit Numbers: 96-A-1282 & 96-A-1283

Dear Mr. Waters:

This letter transmits the permits for the following air contaminant sources and their control devices described in your air construction permit applications of June 25, 1996.

<u>Source Description</u>	<u>Control</u>	<u>Testing Required</u>	<u>IDNR Permit Number</u>
Paint booth	Roll type filters	Yes	96-A-1282
Sand blaster	Reverse jet fabric dust collector	No	96-A-1283

Your attention is directed toward the specified permit conditions contained within the permits. Based on the information submitted in your application, the Department has made the following determinations:

- 1.) This project is not subject to the New Source Performance Standards (NSPS).
- 2.) This project is not subject to National Emissions Standards for Hazardous Air Pollutants (NESHAPS) at this time.
- 3.) This facility is minor with regard to Prevention of Significant Deterioration (PSD) regulations. PSD review is not required at this time.
- 4.) The Department reserves the right to require a stack test of the source under permit 96-A-1283 if that source is used an average of six (6) or more hours per day over a one week period.

When requesting a modification of the permit, use the permit number and your plant number for identification.

If you have any questions, feel free to call Chris Roling at (515) 242-6002.

Sincerely,

David Phelps, Supervisor  
Air Construction Permitting  
Air Quality Bureau
